SECTION 4: FIRST AID MEASURES

After inhalation:

Remove person to fresh air. Call a doctor if you feel unwell.

After skin contact:

Take off immediately all contaminated clothing. Finely wash skin first with water with soap, then with plenty of water. Get medical advice/attention if you feel unwell.

After eye contact:

Remove contact lenses, if present and easy to do. Rinse the eyes with plenty of water with obtuse eyelids for 10-15 minutes. Avoid strong water jet - the risk of corneal damage. If eye irritation persists: Get medical advice/attention.

After ingestion:

Do not induce the vomiting. Rinse mouth. If it's needed, contact a doctor. Have product container or label at hand. Never give anything by mouth to an unconscious person

4.2 Most important symptoms and effects, both acute and delayed

After inhalation: In case of exposure above the NDS, symptoms of acute nicotine poisoning are: agitation of breath, nausea, vomiting, pain and dizziness, diarrhea, tachycardia, blood pressure increase, sweating and salivation, burning in the mouth, throat and stomach.

After skin contact: Irritation, redness, dry skin, sensitive people allergic reaction. Nicotine contained in the product is absorbed through the skin, therefore, with long-term contact with the skin, the symptoms may be the same as if swallowed: breathing problems, dizziness, cramps, vomiting, vomiting, and death.

After eye contact: redness, lachrymation, momentary irritation

After ingestion: Nausea, vomiting, diarrhea, in extreme cases after drinking a very large amount of product symptoms of poisoning: nausea, respiratory problems, dizziness, respiratory disorders.

4.3 Indication of any immediate medical attention and special treatment needed

In case of doubt or symptoms seek medical advice. The decision on the method of treatment will be decided after a thorough medical examination of the injured.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media: carbon dioxide, foam, dry chemical, water fog. Fire fighting agents should be adapted to the burning environment.

5.2 Special hazards arising from substance or mixture

Hazardous decomposition products in the event of fire: carbon monoxide, carbon dioxide, acrolein. Avoid inhalation of combustion products can pose health risks .

5.3. Advice for firefighter

Wear a self-contained breathing apparatus and protective firefighting equipment (fire helmet, jacket, trousers, shoes and gloves). Use clothing that is resistant to high temperatures and chemicals. Threatened containers should be cooled with distilled water jet from a safe distance.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures.

Limit the access of outsiders to the crash site. Use personal protective equipment. Section 8 of the safety data sheet. In case of large leakage, isolate the affected area. Avoid contact with eyes and skin. Avoid direct contact with the release product. Ensure adequate ventilation. Do not pass over spilled material (risk of slipping). Remove any source of ignition, extinguish the fire.

6.2 Environmental precautions

Avoid splashing of the mixture into drains, surface water and soil. In case of large amounts of spillage into the environment, inform the appropriate emergency services

6.3 Methods and materials for containment and cleaning up
